The source of Ayran Su is located in high altitude Ayran region near Amanus Mountains, which is naturally isolated from environmental influences by fir and oak trees.

In the first years of 20th century, the French residents in the area built a modern facility and this magnificent water has been offered to the consumers in Turkey, Middle East and Europe for decades.

Our company was founded in 2012 and in our modern facilities the production of Ayran Su, which is said to be the second best in Europe, started in the same year.

Ayran Su's flow, mineral composition and taste remain stable throughout the year. Fed by the natural richness of intact environment, Ayran Su is the source of health and taste.

Calcium (Ca)	8,55	mg/L
Magnesium (Mg)	3,15	mg/L
Aluminum (Al)	0	µg/L
Ammonium (NH4)	0	mg/L
Chloride (Cl)	3,12	mg/L
Conductivity	110	20 °C'de µS/cm
pH	7,44	pH Birimless
Iron (Fe)	0	µg/L
Manganese (Mn)	0	µg/L
Oxidizability	0	mg/L O2
Sulfate (SO4)	8,37	mg/L
Sodium (Na)	3,86	mg/L
